

**Title of the project / Título del proyecto:**

Attention systems for victims of domestic violence in the rural European scope.

Draft proposal under **Call for proposals for action subsidies 2016: victims of domestic violence and early prevention: [REC-VAW-AG-2016](#)**

**General objective / Objetivo general:**

To generate a detection, follow up and response strategy for victims of domestic violence in a rural setting, assuming that they represent specific realities and challenges that require specialised attention in each of the three strategy dimensions..

**Specific objectives / Objetivos específicos:**

To fulfil the main objective, there should be:

- 1) Specific developed detection systems for the levels and characteristics of this violence.
  - a. An understanding and contextualisation of the varied cultural, economic and social landscape that defines these settings.
  - b. Detection of the transverse variables that outline the conditioning factors of violence in the variety of landscapes and case studies.
  - c. Establishment of formal and informal detection systems of this violence, adapted to the context.
- 2) Establishment of an active and dynamic system of Good Practices.
  - a. Drafting and circulation of a reference and dynamic text, of public access and permanently updated.
  - b. Creation of a bank of experiences with a standard accumulation of good practices, managed correctly and in network format so as to establish links between agents that are faced with similar problems.
- 3) Design of flexible action protocols depending on the specific needs of each setting and complying with the peculiarities of the existing response system.
- 4) Development of training programmes with the aim of spreading the knowledge generated by this project and promoting the work methods based on an empirical analysis and on the need to share experiences.
